

technical intelligence solutions

OUR CAPABILITIES

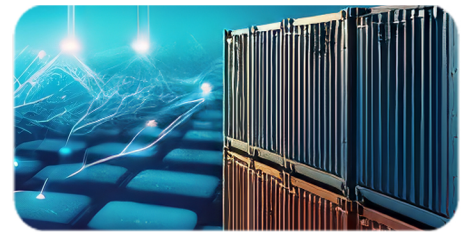

PLATFORM

- ▶ System Architecture
- ▶ Site Reliability Engineering
- ▶ Cloud Infrastructure
- ▶ Containerized Computing
- ▶ Cybersecurity Engineering & Zero Trust

- ◀ DevSecOps ▶
 - ◀ Agile ▶
 - ◀ GitOps ▶
 - ◀ CI/CD ▶

SOFTWARE

- ▶ Big Data Engineering & Insights
 - ▶ Full Stack Development
- ▶ AI, Machine Learning, & Automation
 - ▶ Observability Dashboards
 - ▶ Issue Anticipation

SOLUTIONS: THE RIGHT WAY, THE FIRST TIME

- ▶ Our SMEs architect and integrate streamlined solutions across networks. We've helped bring projects to PoR status, automated security compliance, and achieved 99.9% service level capability.
- ▶ At the tactical edge, TIS was commended for engineering quick reaction capabilities that reduced cost while dramatically accelerating the rate of critical CEM data transfers.
 - ▶ Our system observability stack enables issue anticipation and resolution, while reducing expense.
- ▶ We reduced deployment time needed for a STIG compliant secure infrastructure and platform toolset from weeks or months, to a few days or even mere hours, regardless of classification level.

ENGINEERED TO SUPPORT THE WARFIGHTER

- ▶ We've forged our reputation serving DoD customers like DTRA, SOCOM, and CDAO.
- ▶ Founded and run by experienced engineers, we understand our customers' technical requirements and how to deliver the innovative solutions needed to meet them.

LET'S TALK.
